ATA Placement Rate Methodology ABHES

ATA utilizes the following methodology to calculate placement rate as is required by ABHES:

- A graduate must be employed for 15 days and the verification must take place no earlier than 15 days after employment.
- The placement rate is determined by using the ABHES required method of calculation, for the reporting period July 1 through June 30, as follows:
- Placement Rate = (F + R)/(G - U)
  - $F$ = Graduates placed in their field of training
  - $R^*$ = Graduates placed in a related field of training
  - $G$ = Total graduates
  - $U^{**}$ = Graduates unavailable for placement

*Related field refers to a position wherein the majority of the graduate’s job functions require the use of skills and knowledge acquired through successful completion of the training program.

**Unavailable is defined only as documented: health-related issues, military obligations, incarceration, continuing education status, or death.
