ATA Placement Rate Methodology ABHES

ATA utilizes the following methodology to calculate placement rate as is required by ABHES

- A graduate must be employed for 15 days and the verification must take place no earlier than 15 days after employment.
- The placement rate is determined by using the ABHES required method of calculation, for the reporting period July 1 through June 30, as follows:
- Placement Rate = (F + R)/(G-U)
  F = Graduates placed in their field of training
  R* = Graduates placed in a related field of training
  G = Total graduates
  U** = Graduates unavailable for placement

  *Related field refers to a position wherein the majority of the graduate's job functions require the use of skills and knowledge acquired through successful completion of the training program.

  **Unavailable is defined only as documented: health-related issues, military obligations, incarceration, continuing education status, or death.
