**Course Descriptions**

**COD140 Basic ICD-10-CM Coding**  
**4 Credit Hours**  
**30 Lecture Hours**  
**20 Lab Hours**

This course develops skills in the use of ICD: International Classification of Diseases coding principles. The text will assist the student to reference course workbook, and associated manuals, while matching procedures, evaluations, and assessment to numeric codes. Also, coding laws and ethics will be discussed. Instructional Goals: The primary goal of this course is to expand the student's coding knowledge, specifically in ICD-10-CM coding challenges.

**COD141 Advanced ICD-10-CM Coding**  
**4 Credit Hours**  
**30 Lecture Hours**  
**20 Lab Hours**

This course is designed to advance the student to a more heightened awareness of ICD-10 medical coding and to provide an advanced approach to diagnostic coding. This course is a continuation of prior exposure to coding and how the classification system is maintained. Instructional Goals: The primary goal of this course is to expand the student's coding knowledge, specifically in troubleshooting coding errors.

**COD155 AAPC Professional Medical Coding**  
**10 Credit Hours**  
**100 Lecture Hours**

This course is primarily centered on the use of the CPT: Current Procedural Terminology coding system. Principles of ICD- 10-CM are covered briefly. The HCPCS (Healthcare Common Procedural Coding System) is explained and practice examples are given. The texts used cover all sections of CPT and the coding guidelines applicable to each section are discussed. End of chapter questions are assigned and reviewed. In addition,

Medicare rules and regulations governing CPT coding procedures will be discussed.

**COD175 Coding Certification Review**

**4 Credit Hours**

**40 Lecture Hours**

This course is designed to help prepare the student to perform well on the Certified Professional Coder (CPC) Certification Examination. The principal guidelines for this course are based on the American Academy of Professional Coders (AAPC) Certification Examination Content Outline. There are five major areas of comprehensive review: Medical Terminology & Anatomy, ICD-10-CM Coding Guidelines/Application, CPT Coding Guidelines/Application, HCPCS Coding Guidelines/Application & Reimbursement Guidelines/Application.
